**Re: Porters Subdivision – Phase 2 (Ross, Carl & Ruth)**

*August 21, 2023*

Dear Homeowner and/or Tenant:

This notice is to inform you that beginning on August 22, 2023, and estimated over the next 2-3 months, 291 Construction is utilizing a temporary watermain (above ground) to properties in the Phase 2 construction area in Porters Subdivision. This letter is to advise you of recommendations from the Municipality of commissioning the temporary watermain. The temporary watermain includes the following:

- Chlorinating, bacterial sampling.
- Water service connection from the temporary watermain to hose connections at the side of your house. This is to ensure properties have water for the duration of the watermain replacement.

**Disruptions:**

- There will be a slight water disruption on your property when 291 Construction switches from the existing watermain to the temporary watermain installed above ground.
- 291 Construction will be knocking on your door to notify you to turn your water meter valve off, if you are unsure how to turn the valve off, the Contractor, or the Municipality will be able to assist at a convenient time for you.

**Recommendations**

- While the Temporary Watermain is in place, the Municipality recommends by-passing your water softener for the duration of the temporary watermain (estimated at 2-3 months). The Municipality will issue another letter notifying residents of the switch back from the temporary watermain to the new watermain closer to the commissioning date.

We appreciate your patience and understanding during this construction n period. If you have any questions regarding temporary water, please reach out to the number below.

**Kevin Willson**

**Environmental Services Superintendent**
